

ICS4U - Assignment - EightyNine

Write a function that receives an array of `int[]` and returns a rearranged array such that every 8 is followed by a 9, **only move the 9's** and **keep the relative order of the remaining array the same**, there are equal number of 8's and 9's in the array. Do not import or use any libraries.

Example: if `a = {4,7,3,8,2,9,1,9,8,2}`, return `{4,7,3,8,9,2,1,8,9,2}`
